

1409	1412	1812
Artichoke - Main island on top rostrum looks like an artichoke	Berg - Short for iceberg. The scarring on the front looks like an iceberg and pays homage to the Iceland connection	Artio - The V-shaped indent in the center of the back of 1812's bonnet resembles the hoof of a cloven-toed animal. Artio is a Greek word meaning "even number". This name would pay homage to the cloven-toed ancestors of cetaceans, the artiodactyls
Askew- Island formation	Bumble - Given this is an Iceland whale with a big, white moustache and "snowflakes" all over her body, naming her after the Abominable Snowman in the Rudolph movies would be hilarious and appropriate	Artiodactyla - The V-shaped indent in the center of the back of 1812's bonnet resembles a cloven-toed hoof. The name "Artiodactyla" would pay homage to the cloven-toed ancestors of cetaceans
Cairn - Cairn is a mound of rough stones built as a memorial or landmark, which the islands and bonnet look like	Cappuccino - The location of the white scar at the front of 1412's bonnet makes it seem as though they dipped their nose into foam while sipping a cappuccino	Bullfrog - Looking from head to tail: Bonnet is birds eye view of a frog sitting. Ridges show eyes and back of frog
Dreamy - The bonnet looks like one of the bubbles that cartoonists put above the head of a character that is daydreaming	Crash- Markings on rostrum, Scarring in front of bonnet	Clove - The V-shaped indent in the center of the back of 1812's bonnet resembles the hoof of a cloven-toed animal. This name would also pay homage to the cloven-toed ancestors of cetaceans, the artiodactyls

1409	1412	1812
Imagine - The bonnet & islands look like a thought/idea/imagination bubble	GypSea - For all the wandering of the sea that she's known for	Cuttlefish - 1812's bonnet is similar in shape to the body of a cuttlefish
Pensive - The bonnet and islands looks like a thought bubble	Halfmoon - Halfmoon outline shape to scar from left head view of scar near bonnet	Leatherback - The bonnet shape and ridges looks like a leatherback turtle
Pisa - Bonnet/islands look like the leaning tower of pisa	Handlebar - The scarring on the front of the rostrum looks like a handlebar mustache	Notch - Looks like someone carved a clean notch in the back of the bonnet
Repeat - The scar behind and the PBH callosities make the musical symbol for "repeat" :	Ice - Goes to Iceland, scarring looks like ice and may have been caused by ice	Piscis - Latin for fish. The marks on bonnet resemble a fish.

1409	1412	1812
	Icebreaker - Icebreaker is a special-purpose whale designed to move and navigate through ice-covered waters and provide safe passage to her calves and other Icelandic whales like herself. Her chin scars and habitat use are unique and impressive and the name is a nod to her bowhead cousins	Pizza - Triangle taken out of the coaming looks like a slice of pizza!
	Icebreaker - The uneven callosity looks like the burls of a redwood tree. Burls are knobby growths found on trees	Ripley - The bonnet looks like the chestburster scene in the 1979 classic movie Alien. Since there is already an "Alien" she could be named after the iconic female character Ripley
	Iceburg - Goes to Iceland, scarring looks like ice and may have been caused by ice	Secord - 1812's bonnet looks like an old-timey dress, with puffy sleeves and a full skirt, as may be appropriate for an old-timey lady, and given her ID number, I propose the name Secord. Before Laura Secord was a delicious brand of chocolates, she was a Canadian hero in the War of 1812, who is known for sneaking through occupied territory to deliver information about a planned ambush to the military. She had to risk her life to go on this important journey, which is fitting of a female right whale in the current environment

1409	1412	1812
	Iceland- She's the famous Iceland whale!	Slipper - 1812's bonnet is also similar in shape to that of a slipper lobster
	Latte - The location of the white scar at the front of 1412's bonnet makes it seem as though they dipped their nose into foam while sipping a latte	Splinter - The small scar on the right head is quite distinctive, and it could also refer to the splinter of dark skin in the back of the bonnet
	Reykjavik - Because she is an Iceland whale and the white scarring in front of the bonnet is very ice or snow like	Valor - for the V in the bonnet and Eg1812
	S'mores- The white and brown on the bonnet looks like a toasted marshmallow	Venus - V indent looks like venus fly trap opening; also starts with the letter V
	Snow - For all of the white marking on her head and body, plus for her Iceland connection	Veteran - for the V in the bonnet and Eg1812
	Snowy - For all of the white marking on her head and body, plus for her Iceland connection	Victory - for the V in the bonnet and Eg1812

1409	1412	1812
	Spider - White scarring looks like a spider	Vulcan - V on bonnet
	Stranger - She is mostly a stranger to the east coast and her appearance is definitely strange with all the scarring in the front of the rostrum	War - For the War of 1812. Historical, funny, and memorable. She's a trooper who has survived 5 different entanglement events over the years and given birth to 6 calves. Also, her bonnet looks like two cannons pointed at a ship (coaming) and the scar is a warhead/missile
	Yeti - A cryptid whale, living in a remote, frozen locale, with patches of white to blend into the ice	

1820	2681	2930
Bottle - The shape and symmetry of the callosity looks like a wine bottle	Band-aid - The scar in front of the coming looks like a band-aid	Barbell - For the scar connecting the islands, looks like a barbell or a dumbbell
Candle - Bonnet shape	Chaplin - Scar looks like Charlie Chaplin's mustache	Bridge - Bridge connecting islands
Cello - bonnet shape looks like a cello plus the scar behind the blowholes looks like a bow	Doing - Seems to have run into something with the scar, etc.	Bridge - For the scar connecting the two islands
Cello - The bonnet shape looks like a Cello	Fiddlehead - The bonnet and islands look like a fiddlehead fern	Covalent -The thin white scar connecting the two islands resembles a covalent bond that connects two electrons

1820	2681	2930
Cirrus - For the scarring on the left dorsal fluke--looks like wispy cirrus clouds	Hockey - The white scar looks like a hockey puck and the bonnet resembles the Stanley Cup	Electric - same theme re: charge/spark between islands
Cricket - Callosity looks like a cricket bat	Hyphen - orizontal dash like scar in front of blowhole callosities. Mother's name is punctuation, so it makes sense for his name to be some type of punctuation!	Izzy - Did anyone else watch Digimon in 1999? No? Just me? The two islands and the scar connecting them look exactly like the Crest of Knowledge, which in the show was the symbol of a character named Izzy
Esraj - The shape of the callosity on 1820's bonnet is very similar to that of the esraj, an instrument used in Indian classical music. The esraj is a bowed instrument and the scar behind 1820's PBH callosities is reminiscent of a bow	Hyphen - The scar anterior of the coaming looks like a hyphen sign (-), and since his mother is Punctuation it would be a family name	Libra - The two islands connected by the scar look like the two scales in the symbol for Libra
Galaxy - Fluke scarring resembles Milky Way galaxy.	Puck - The white scar looks like a hockey puck and the bonnet resembles the Stanley Cup	Morpheus - This name would be in reference to 2930's two islands connected by the persistent scar. This pattern is similar to the iconic pince-nez eyeglasses worn by Morpheus in the Matrix trilogy

1820	2681	2930
Jellyfish - 1820's bonnet also resembles a jellyfish in shape	See-saw - The bright white scar looks like it's balanced on the front of the coaming	Orzo - The white scar on the right side is shaped just like orzo pasta
Nebula - Scar on fluke looks like a nebula (an interstellar cloud of dust and gas).	Snail - main callosity looks like a snail coming out of the shell towards blowholes	Pince-nez - The two islands that are connected by the persistent thin scar are reminiscent of pince-nez. Pince-nez is a style of eyeglasses that is supported without earpieces. It was popular in the 19th century
Spyglass - The shape of this whale's bonnet is very similar to that of a spyglass, which is a telescope-like device that was used by naval officers and ship captains to navigate the oceans and seas between the 16th and 18th centuries. The shape of 1820's bonnet seem as though it is a spyglass facing out towards their path in the ocean	Stitch - The white scar on the combing looks like a perfect stitch	Spark - same theme re: charge/spark between islands

1820	2681	2930
Telescope - In addition to resembling a spyglass, the shape of this whale's bonnet is similar to the shape of a retractable telescope		Specs - Short for spectacles. The two islands connected by the scar look like a pair of spectacles perched on the rostrum
Trinity - looks like a nuclear explosion - Trinity is the code name for the 1945 nuclear test		Spectacles - line connecting two islands looks like a pair of spectacles
Violin - Bonnet shape plus the scar behind the blowholes looks like a bow		Tightrope - For the thin scar between the islands
		Vandergraph - We've all seen the demos in science class/museums. Islands & scar looks like the spark jumping between the two
		Weightlifter - For the scar connecting the islands, looks like a weight for a weightlifter
		Yo-Yo - The islands with the line between looks like Yo-Yo

1820	2681	2930
		<p>Zan - Zan is the male twin of the Wonder Twins (1970s and '80s Super Friends TV shows). Zan and his sister Jayna activate their superpowers when they touch fists: "Wonder Twin Powers Activate!". The thin scar connecting two islands of callosities evoke that energy transfer. Among his superpowers, Zan "can transform himself into atmospheric disturbances (usually very localized) involving water, such as a blizzard, a monsoon, waterspout or a typhoon". Right whales could really use some superpowers these days.</p>

3232	3317	3320
Bedazzle - All the mandibles, and merged circular head callosities look like someone bedazzled this whale	Altamaha - Mother is SILT; Prop scars on back look like a river delta from the air. Altamaha river delta in Georgia feeds into the right whale calving grounds	Braces - Left lip scars resemble braces on teeth
Breadcrumb - For the multiple mandibles on the right that resembles a trail of breadcrumbs	Bert - Single post blowhole callosity looks exactly like Bert from Sesame Street's unibrow	Burl - The uneven callosity looks like the burls of a redwood tree. Burls are knobby growths found on trees
Cattail - Mother is 'catpaw'. Linear scar on right leading edge of fluke (tail) looks like the top of a cattail reed	Blackjack - Coaming looks like a blackjack (also a little obscene)	Cumulus - Scars on her lip look like cumulus storm clouds on the horizon
Cerberus - The three headed dog, Cerberus, from Greek mythology - for the three peninsulas on the bonnet	Cavebone - Coaming shaped like a bone, i.e. Flintstones club	Elder Wand - uneven callosity shape resembles wand from Harry Potter

3232	3317	3320
Chimera - For the bonnet shape that looks an animal with three heads	Cliff-dive - Cliff-dive: The single postblow, scar, and bonnet shape usually clue me into this whale pretty quickly. So, I'm trying to incorporate all three or at least 2/3 into a name. I picture a diver leaping from a cliff (her postblow). I also like that this name has an earthy/ocean connection (3317's mom is Silt), so if you remember numbers by association then this may help	Overbite - The scarring on the left lip is heavily reminiscent of a cartoon character with an overbite
Dots - Many islands	Eyelash - The scar on the right side of the head looks like an eyelash	Perforate - Left lip scars are like a perforated page or perforations created for stitching
Dot-to-Dot - The mandibles looks like a series of dots, like on a dot-to-dot worksheet	Frida - For Frida Kahlo--the single postblow reminds me of her unibrow	Picket - For the white marks on the right that look like a picket fence
Drip Drop - for scattered markings	Lash - White scar on right head in the shape of an L, like an eyelash on her cheek	Scarlip O'Hara - Stolen from a fin whale (?) for the extensive scarring on the left lip

3232	3317	3320
Indonesia - Means island nation for the many mandibles and the bonnet looks like it is being eroded by rising water	Segway - The coaming and peninsulas look like a Segway	Scraffito - The scarring on the left lip remind me of scraffito art where you scrape away the surface of the clay or paint to reveal the pattern
Keys - All the islands on the mandibles and the erosion in the bonnet are like the low-lying Florida keys	Sickle - Both the scar on the right head and the left head light look like sickle moons	Snaggleteeth - The scars on the chin look like a set of teeth
Lobster - The bonnet looks like a lobster with the claws and head outlined by the tooth decay	Water Balloon - The combing resembles a stretched out water balloon just before it's dropped	Stitches - Left lip scars = stitches

3232	3317	3320
Mangrove - Toothdecay=propoot system, rest of bonnet=trunk, peninsulas=canopy, mandibulars=fish nursery		Tally - for the white marks on the left lip that look like hatch marks or tally marks
Sid - For the well-known character from Ice Age. The bonnet looks like Sid's face either way you look it: the islands attached at the top create the eyes and so does the shape of the tooth decay		Wabi-sabi - Wabi-sabi is a term originating from Japanese culture that emphasizes the beauty of imperfections such as asymmetry. 3320's long, asymmetrical callosity is a perfect example of wabi-sabi
Stegosaurus - The chin mandibles look like the ridges of a Stegosaurus back		
Trio - The negative space of the tooth decay looks like a "3", and there are 3 peninsulas from the bonnet		

3232	3317	3320

3740	3830	3903
Blobfish - resembles a side profile of a blobfish (open mouth towards the tip of the rostrum)	Brow - For the big scar over the right eye	Arrowhead
Butternut - The shape of the bonnet looks like a butternut	Causeway - For the fused islands on the middle of the head	Carrot - Scarring at blowhole resembles carrot with leaves
Dock - It looks like the island is coming in to join with the bonnet – like a pod docking with the space station	Constellation - Son of celeste (meaning heavenly). Constellation for the numerous 'star' callosities on his chin on both sides	Carrot - The callosity in front of the blowhole, in conjunction with the blowholes looks like a carrot
Gap Tooth - Named for the tooth decay in front of bonnet. Resembles a gap between two front teeth	Eyebrow - for large white scar over right eye	Edamame - single pbh callosity looks like an edamame pod

3740	3830	3903
<p>Hitchhiker - The island attached to the bonnet looks like an outstretched thumb</p>	<p>Frida - 3820's fused islands are similar to the unibrow of Frida Kahlo</p>	<p>Flood - The black patch aft of the bonnet comes and goes like it being periodically submerged</p>
<p>Island - For the single island off the bonnet, but might be confusing if it has the same name as the callosity feature</p>	<p>Garlic - Fused islands look like a head of garlic</p>	<p>Floodlight - For the bright white dot on the right head</p>
<p>Isle - For the single island off the bonnet</p>	<p>Groucho - The big scar over 3820's right eye is reminiscent of Groucho Marx's iconic eyebrows</p>	<p>Hole Punch - The white scar on the right head is a clean, bright circle-looks like the paper punched out by a hole punch</p>
<p>Manan - For Grand Manan, referring to the single island off the bonnet</p>	<p>Kahlo - 3820's fused islands are similar to the unibrow of Frida Kahlo</p>	<p>Keyhole - For bare spot in bonnet</p>

3740	3830	3903
Mummichog - The bonnet looks like the shape of a fish	Pangea - The tightly fused islands look like Pangea before it broke up	Marsh - The upper bonnet/island area that changes over time has a mudflat, intertidal vibe. For me, it is less about how the feature looks on any given day and more about recognizing how the feature behaves over time
Pear - The shape of the bonnet looks like a pear	Patch - For the scar above the right eye. It's unique and reminds me of a pirate's patch, arrrgh	Morph -Her callosity is always changing/morphing
Single Groove - Named for the groove or indent in the middle of the bonnet and the single island	Raindrop - Scarring resembles raindrops	Olivia - May 22, 2011. My Grand daughter

3740	3830	3903
Solo - For the single island off the bonnet	Tears - Bonnet, island, coaming, and scar looks like a set of falling Tears	Plum Bob - Island looks like a plumb bob.
Tuna - Fishlike bonnet	Tears - Islands look like tears running down rostrum	Polynya - An area of open water surrounded by sea ice. For the shape shifting bald patch between her islands and bonnet. Pronounced po-lyn-ya
Uno - For the single island off the bonnet		Spade - Spade shaped callosity in front of blowholes
Wally - The bonnet looks like the eponymous character from the movie WALL-E (but spelled like a person's name so as to avoid copyright infringement)		Spotlight - For the bright white dot on the right head
		Tide - The black patch aft of the bonnet comes and goes like it being periodically submerged
		Uno - Daughter of Triology. One odd far back callosity on lower right jaw. (We also have no whales named with 'U' names.)

3740	3830	3903

3940	4129	4140
Goldie - Her bonnet pattern looks like a Goldfish cracker	Bubbly - bonnet and island looks like a bottle of champagne popped and is bubbling	Blackhead - For the dark island on the right head and a connection to family line that has unusual island features and names that go along with them
Koala - 3940's callosities at the front of their bonnet look like a koala gripping the trunk of a tree	Celebration - For the bonnet that resembles a champagne bottle open	Blizzard - For all the white on the flukes
Koala - Bonnet looks like a koala	Cello - Daughter of VIOLA, long callosity looks like a cello	Casper - Named for the friendly ghost (not the mattress company), because sometimes that right island is there, sometimes not, but also, all that dorsal fluke scarring evokes some ghosty vibes
Koala - island looks like a koala	Cornucopia - Shape of Bonnet	Crystal - Scarring pattern looks like the many refractions in crystal

3940	4129	4140
Koala - That bonnet really looks like a koala in an imaginary tree looking at us	Crescendo - The small but obvious scar on the left lip looks like the musical symbol crescendo (gradual increase in volume). His mother's name is Viola, so this name ties into the musical theme	Frost - Dorsal fluke scarring
Moss - Daughter of cypress, for the spanish moss that hangs in the trees and can look like the line scar laying across one of her callosities	Croquet - The left lip scars look like a croquet ball next to a croquet bracket	Heiroglyph - Fluke scarring infers ancient writing
Oceania - Markings resemble a chain of islands, like in the south pacific	Drumstick - The bonnet looks like a turkey leg	Hoarfrost - for the markings on the flukes
Pacman - bonnet shaped like pacman with open mouth	Fang - Scar on left lip resembles a canine tooth/ fang	Honey Comb - The scarring looks like a cross section of a honey comb

3940	4129	4140
Pac-Man - The right bonnet looks like the mouth of Pac-Man	Kombucha - for the bonnet that looks like an open bottle of something carbonated	Humpback - Hey, he has the flukes for it
Pente - The five islands in front of 3940's blowholes form the tips of a five-pointed star, or pentagram. The term pentagram is Greek in origin and comes from the Greek word for the number five, pente	Punching bag - The long bonnet resembles a free-standing punching bag. I want some name that captures the long, straight shape of the bonnet as that is distinctive	Iceburg - For all the white on the flukes
Pineapple - The bonnet and blowhole area both look like a pineapple	Torpedo - Markings resemble a torpedo	Izquierda - Means left in Spanish for the prominent islands on the left side of the head (at times the only islands easily visible). Also coordinates with his mother as she was named after the (birth)marks all over her face and his grandmother who was named for her prominent island

3940	4129	4140
Teddy - Bonnet shape looks like a teddy bear	Venom - Left lip scars ~fangs. 1 is in the shape of a V	Lace - white scarring on flukes looks like lace
Teddy - Callosity at front of bonnet looks like a teddy bear		Lefty lattice - All the visible islands are on the left and the fluke scar is like a lattice. It would be great if the name could incorporate information from both the head and the flukes since we don't always see the flukes
Tetrad - For the group of four on the head		Megaptera - The dorsal fluke looks like a ventral fluke of a humpback, genus Megaptera
Vegas - For the group of four on the head and the scar that resembles dice and the stick the would be used in Craps (which is NOT a good name for a whale)		Mosaic - The pattern of the fluke scarring looks like a mosaic
		Pip - Son of naveus, one distinctive post-blowhole callosity like a single 'pip' on a domino
		Roots - Fluke scars look like bundles of roots.

3940	4129	4140
		Seafoam - For all the white on the flukes
		Snowmass - It looks like a winter mountain pass with scarring on the peduncle and fluke
		Stormshadow - Scarring on fluke

4145

Bouctouche - For the continuous callosity that resembles a sand dune, the the famous dunes in New Brunswick

Button - Island looks like a button. Also a button lift is a specific type of ski lift, which relates this whale to her relatives named Slalom and Mogul.

In-run - The right side of this whale differs from Slalom and Mogul: it has a smooth slope and no island. It looks like a ski jump to me – all clear except the one lift-off point. The in-run is the steep slope leading into the jump

Nimbus - continuous island resembles broom stick from Harry Potter

4145

Piste - For a whale that closely resembles Slalom and Mogul, a name meaning "ski slope" would fit right in. He even has a little skier carving out a turn around the peninsula on the right

Provincetown - For the continuous callosity that resembles a sand dune, the the famous dunes on the Cape

Saber - For very distinctive right lip callosity that looks like a curved sword

Sitzmark - Sitzmark is a sunken area in the snow marking a backward fall of a skier. The island could represent this, and it would maintain a family name (mother is Slalom, brother is Mogul), both of which he resembles with his continuous callosity with an island

4145

Straight run - I want a name that distinguishes this whale from Slalom and Mogul. One big difference is the spaciousness in the right callosity

Sword

Wizard - Scarring looks like a wizard's staff

4145
Xavier - It is my 2.5 year old son's name ... Would be fun to get him interested in what Daddy does to help protect NARWs ... Teach them while they are young! :)

4145
